Before You Begin: Roamvy eSIM Setup

Before installing your Roamvy eSIM, please confirm the following requirements:

Device Compatibility & Unlock Status

Make sure your iPhone supports eSIM technology and is carrier-unlocked. Locked devices or unsupported models may prevent the eSIM from installing or activating correctly.

Stable Internet Connection

Use a stable Wi-Fi or mobile internet connection during installation. A reliable connection ensures your eSIM profile downloads and activates without interruption.

2. Installation Methods

You can install your Roamvy eSIM using any of the three secure methods below. Your installation details are available in your email and in the Roamvy app. Choose the option that works best for you and follow the steps carefully.

Install via the Roamvy App

The fastest and easiest option. Install your eSIM directly from the Roamvy app.

Scan the QR Code

Use your device's camera to scan the QR code provided and install your eSIM instantly.

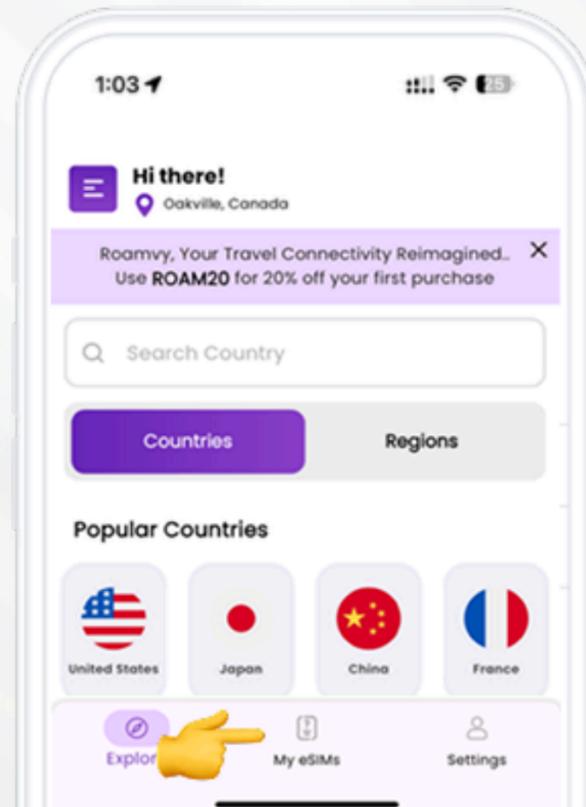

Enter the Details Manually

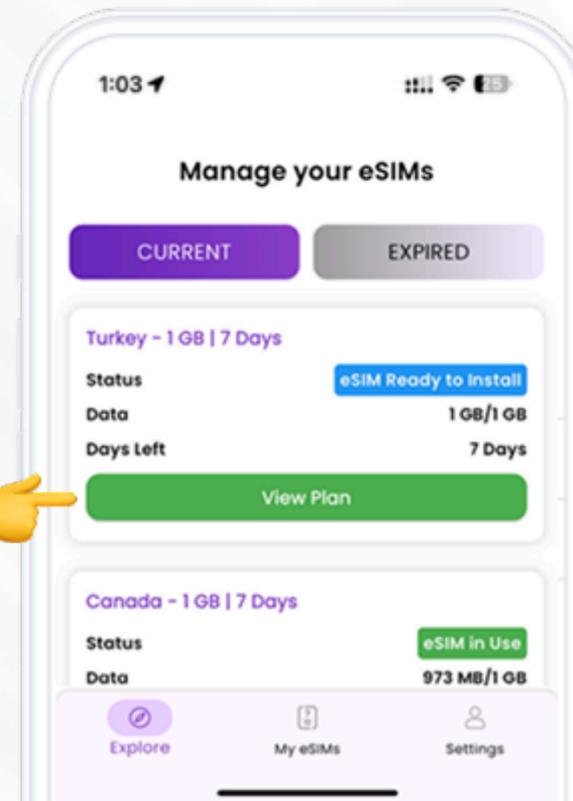

Manually enter the installation details step-by-step. Recommended if QR scanning is unavailable.

For the best experience, install your Roamvy eSIM before your trip so you can connect immediately upon arrival.

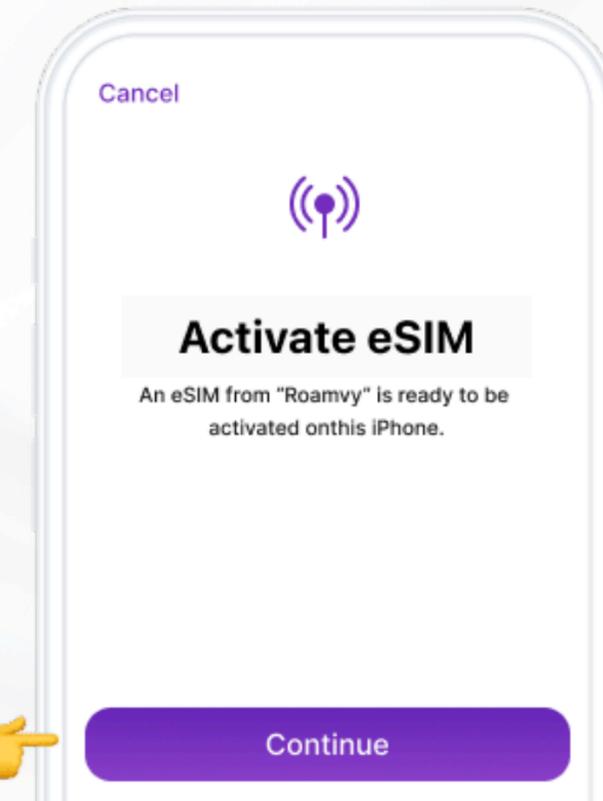

2.1 Installation Using Roamvy App

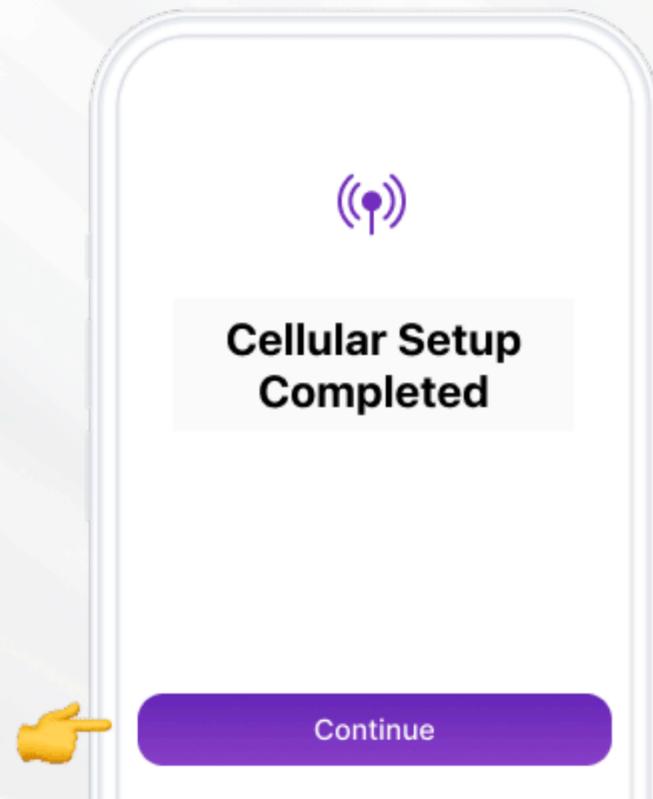

1. Open the Roamvy app and tap **My eSIM**.

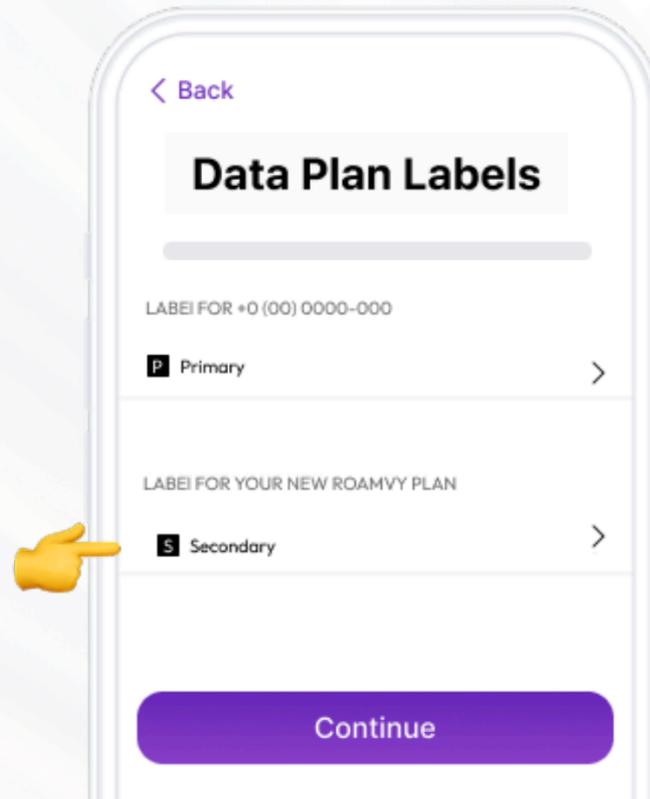

2. Choose the **plan** you want to install, then tap Install eSIM Now.

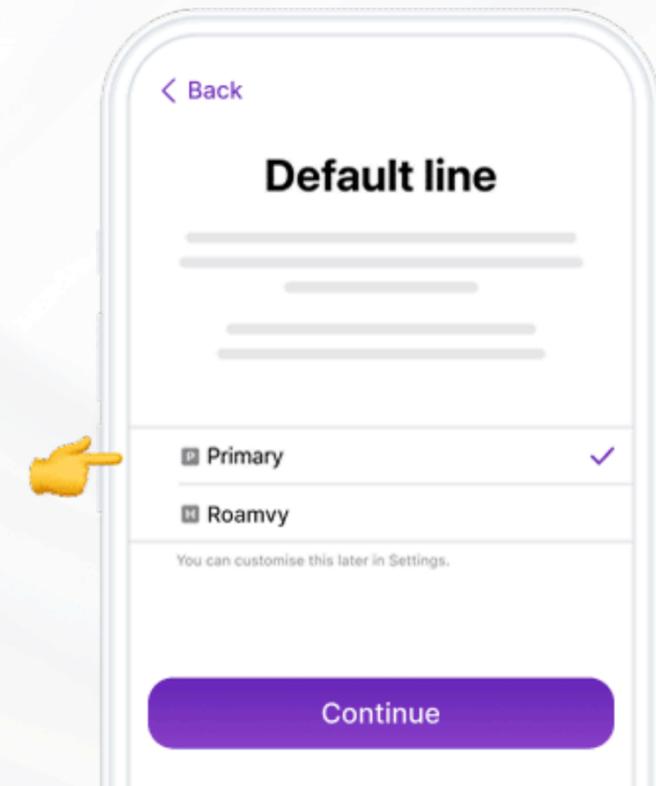

3. When prompted, tap **Continue**. The installation will begin automatically.

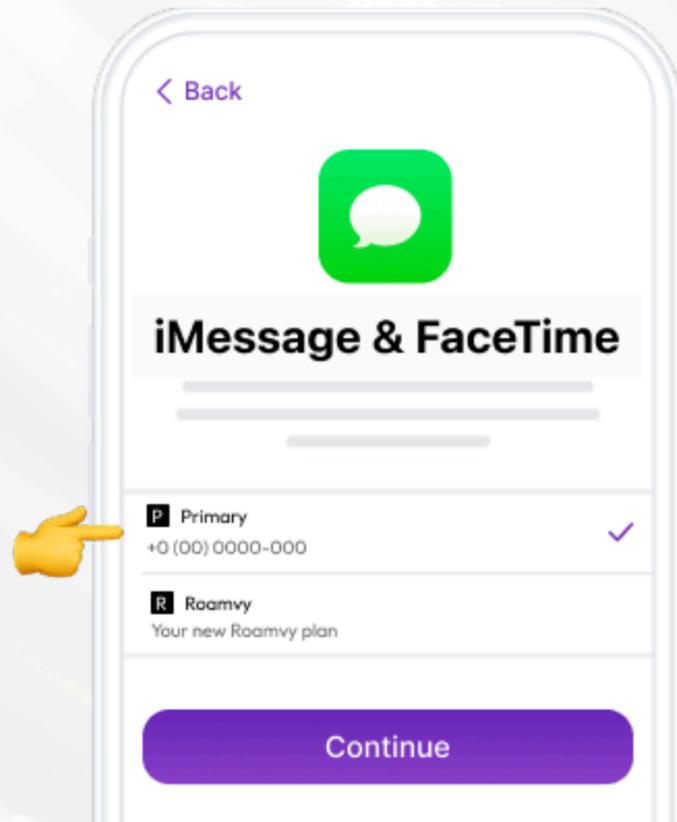

4. When you see **Cellular Setup Completed**, your plan has been successfully installed. Tap **Done**.

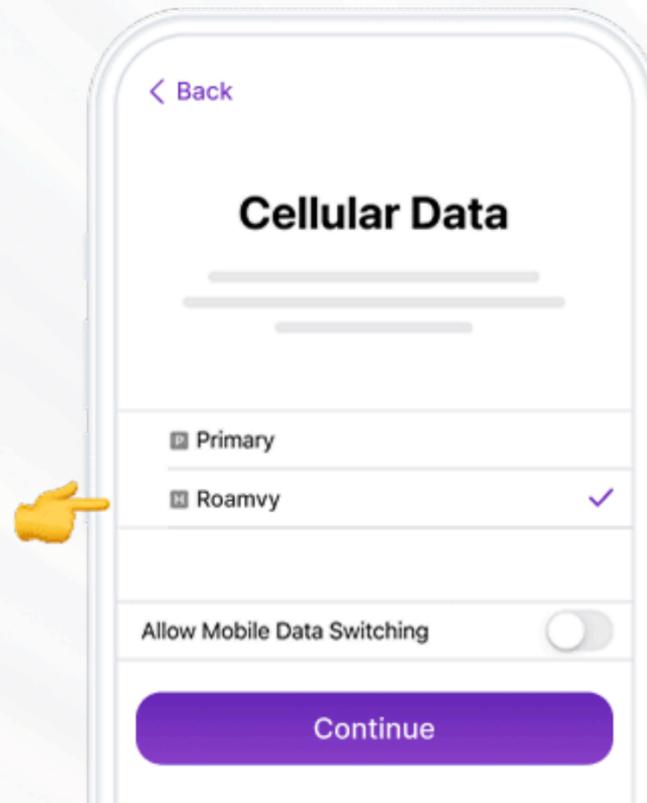

5. Tap the newly added eSIM, rename it to **Roamvy**, and then tap **Continue**.

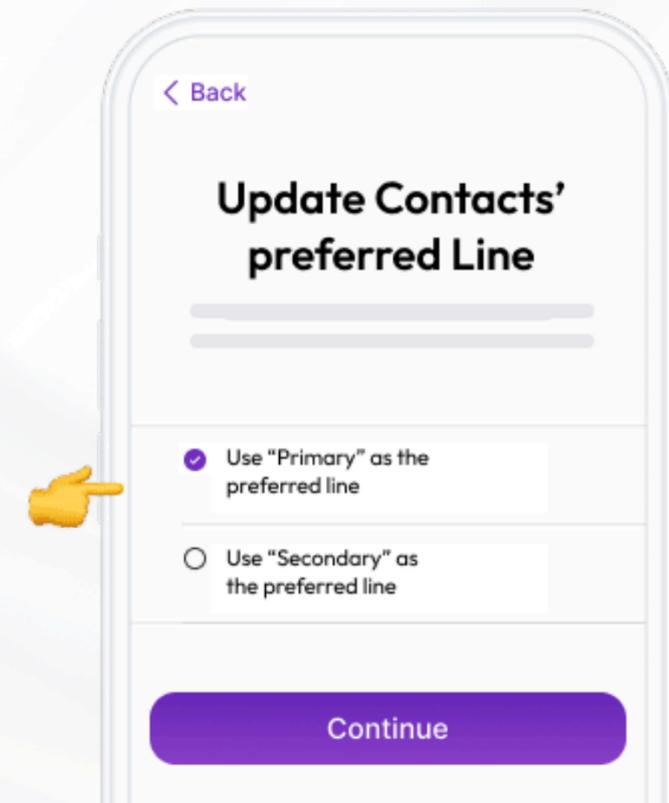

6. Select **Primary** to **continue** using your main number, then tap **Continue**.

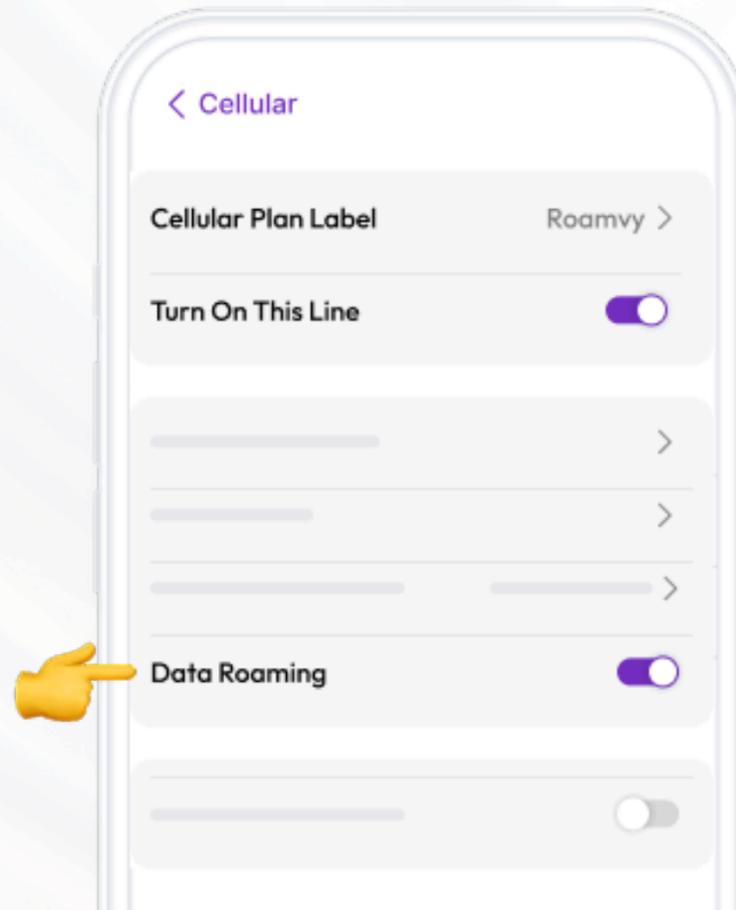

7. Select **Primary** for iMessage and FaceTime, then tap **Continue**..

8. Select the new eSIM added (**Roamvy**) for Mobile Data. Keep Allow Mobile Data Switching **OFF**. Tap **Continue**.

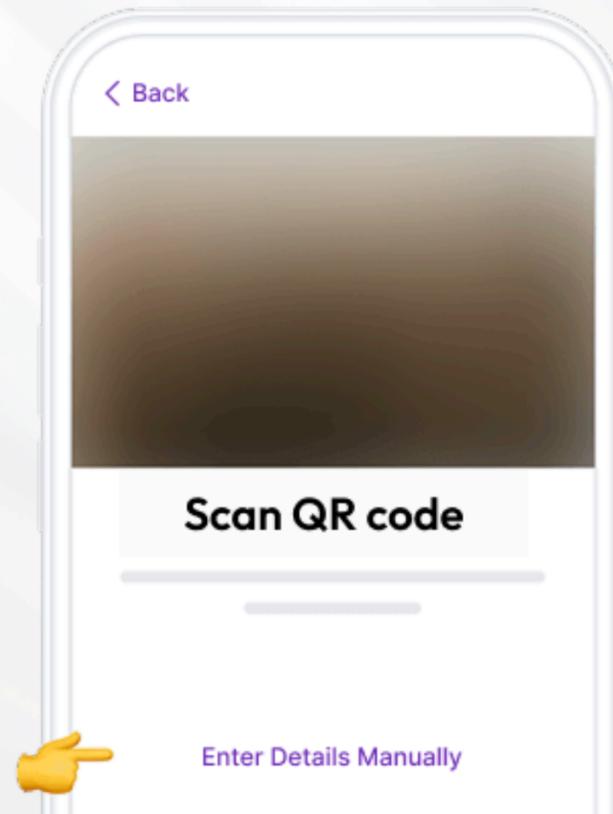

9. Choose **Primary** as your preferred line to keep your contacts safe.

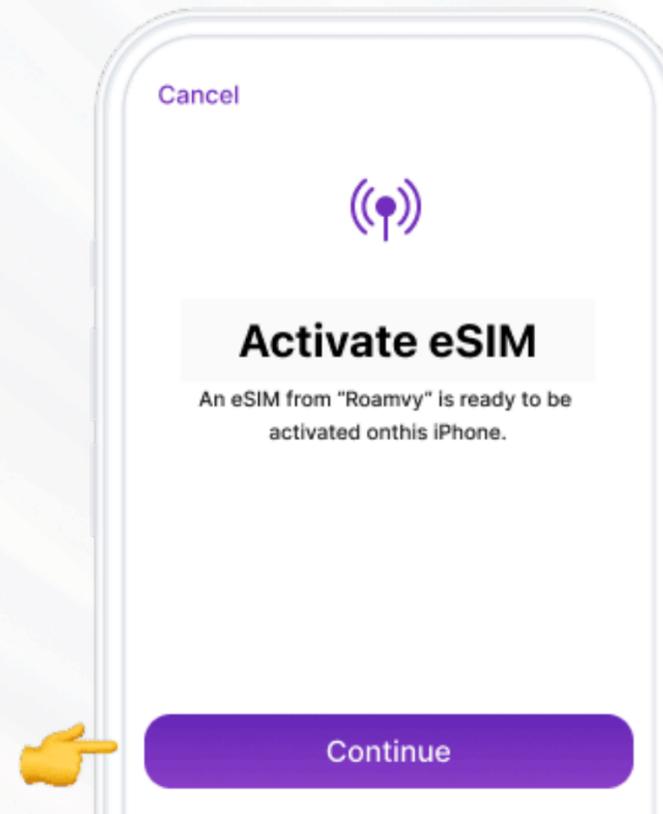

10. Open **Settings** → **Mobile Data** →
Select **Roamvy** → Turn Data Roaming **ON**

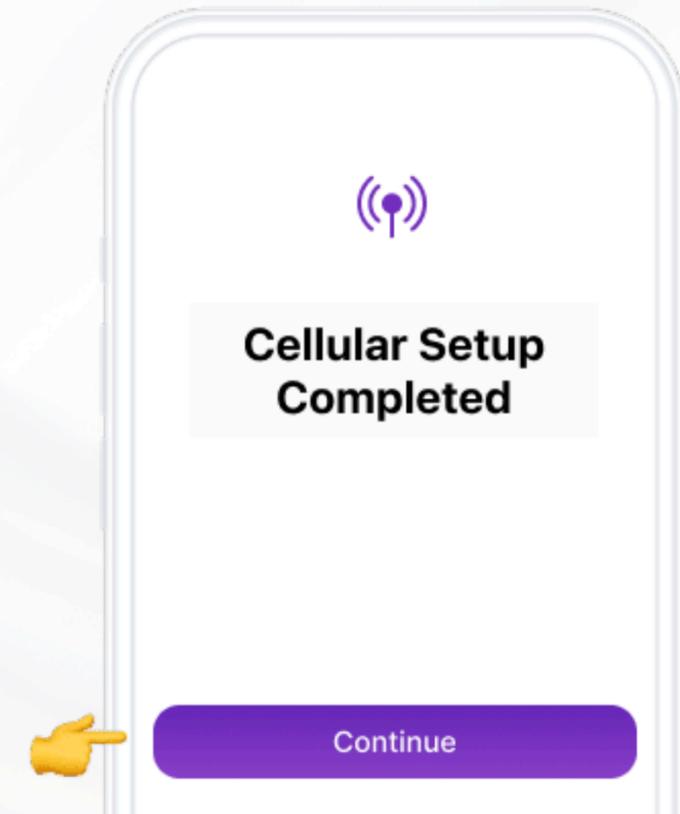

2.2 Installation with QR Code

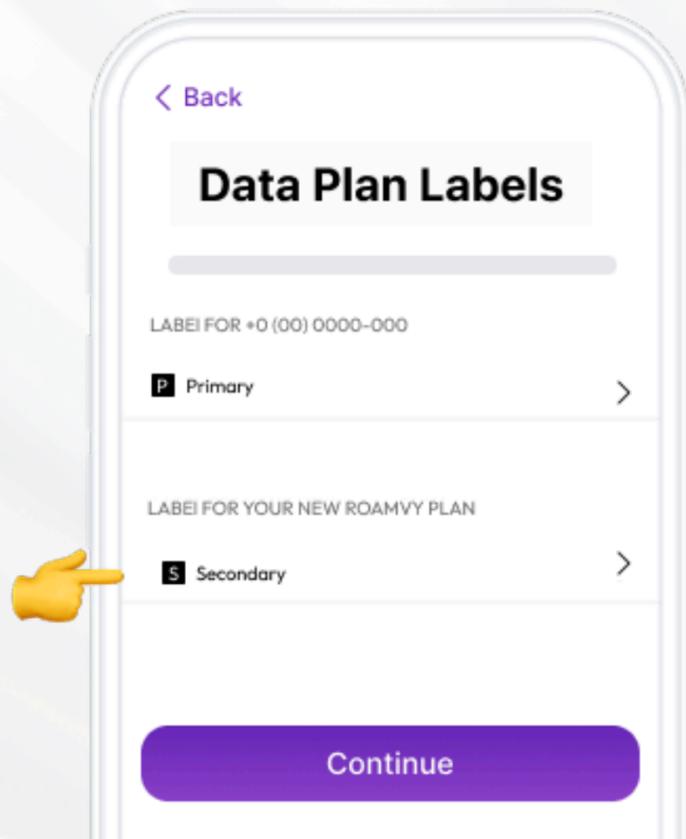

1. Open the Camera, then scan the **QR code** sent to your email.

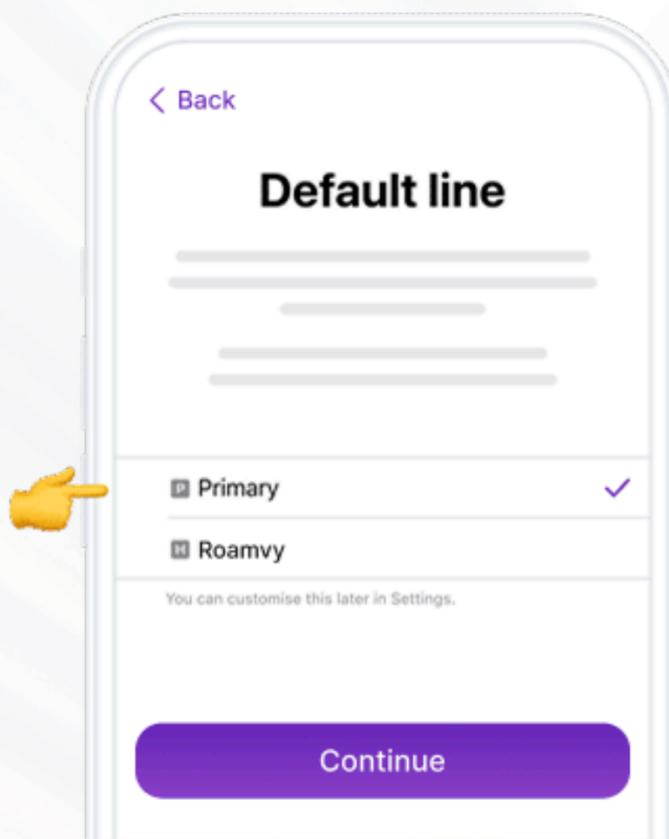

2. When prompted, tap **Continue**. The installation will begin automatically.

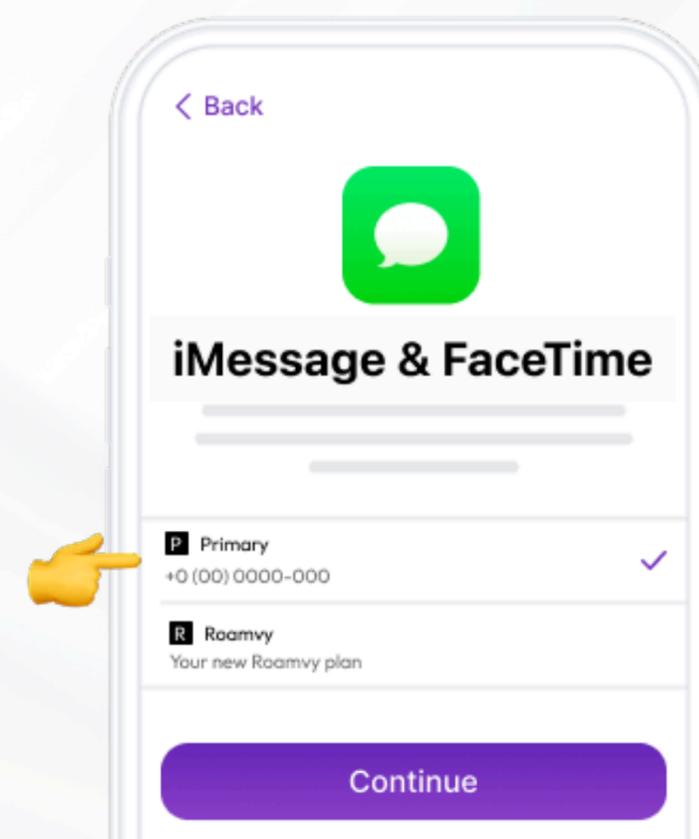

3. When you see **Cellular Setup Completed**, your plan has been successfully installed. **Tap Done**.

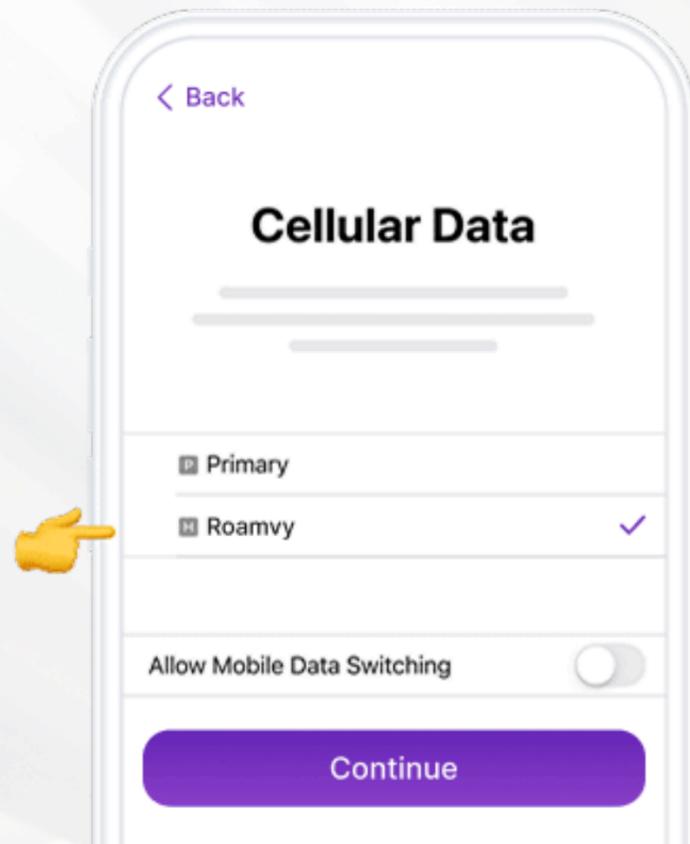

4. Tap the newly added eSIM, rename it to **Roamvy**, and then tap **Continue**.

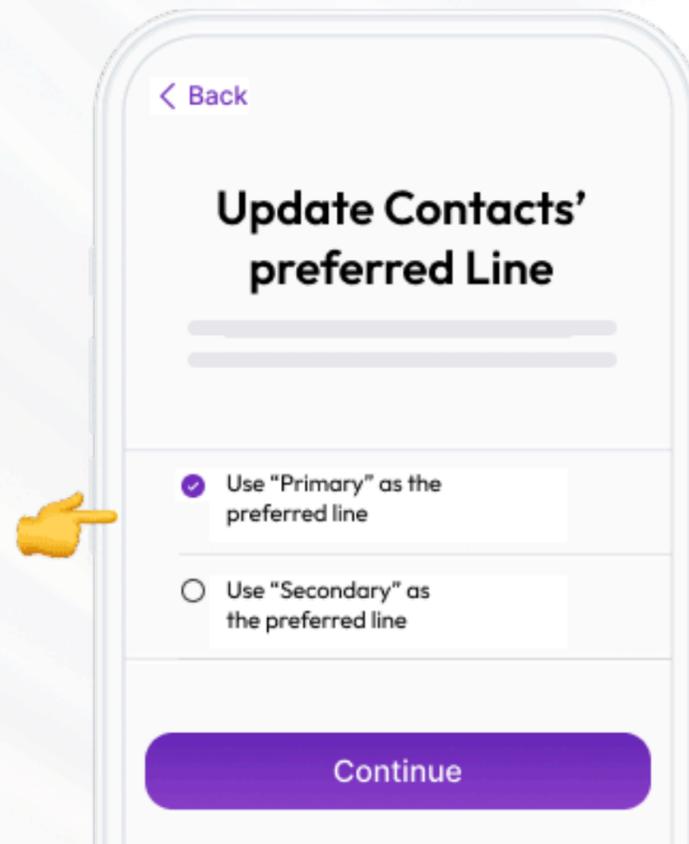

5. Select **Primary** to continue using your main number, then tap **Continue**.

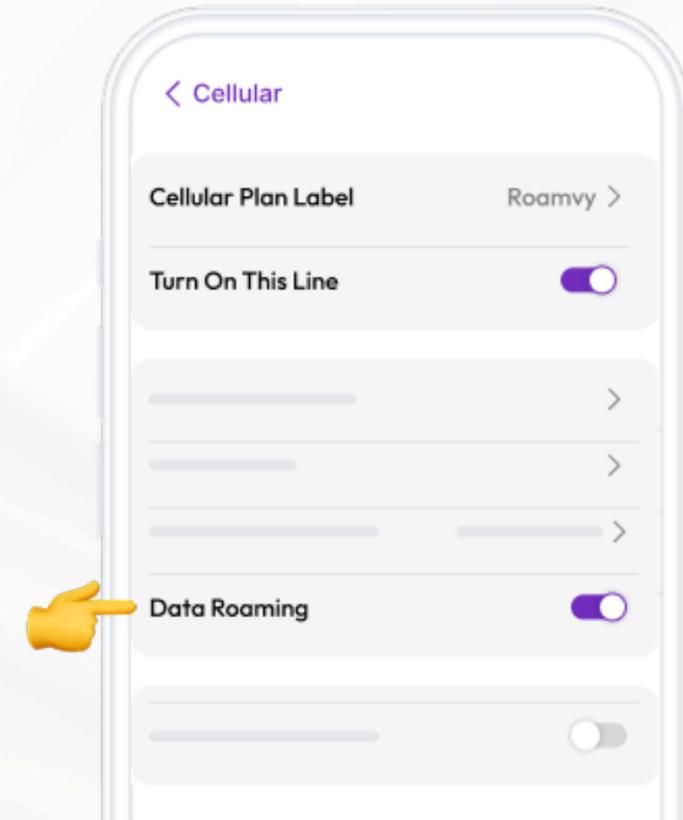

6. Select **Primary** for iMessage and FaceTime, then tap **Continue..**

7. Select the new eSIM added (**Roamvy**) for Mobile Data. Keep Allow Mobile Data Switching **OFF**. Tap **Continue**.

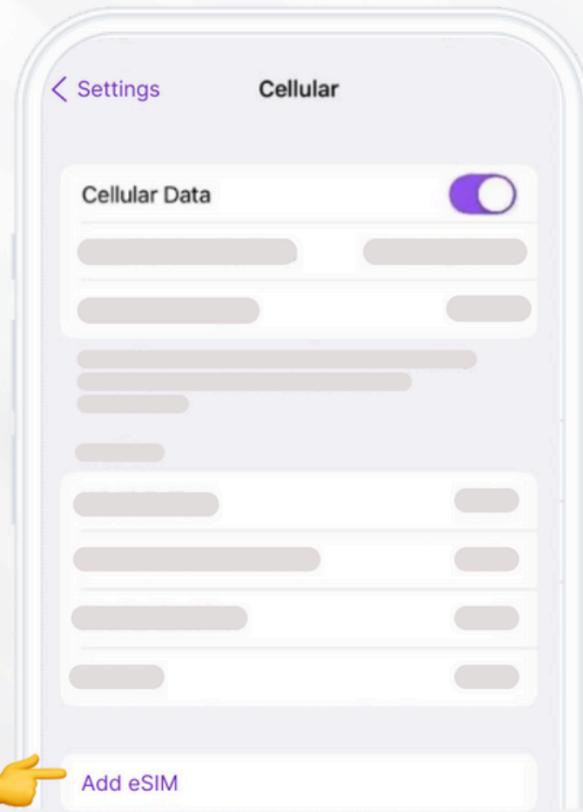

8. Choose **Primary** as your preferred line to keep your contacts safe.

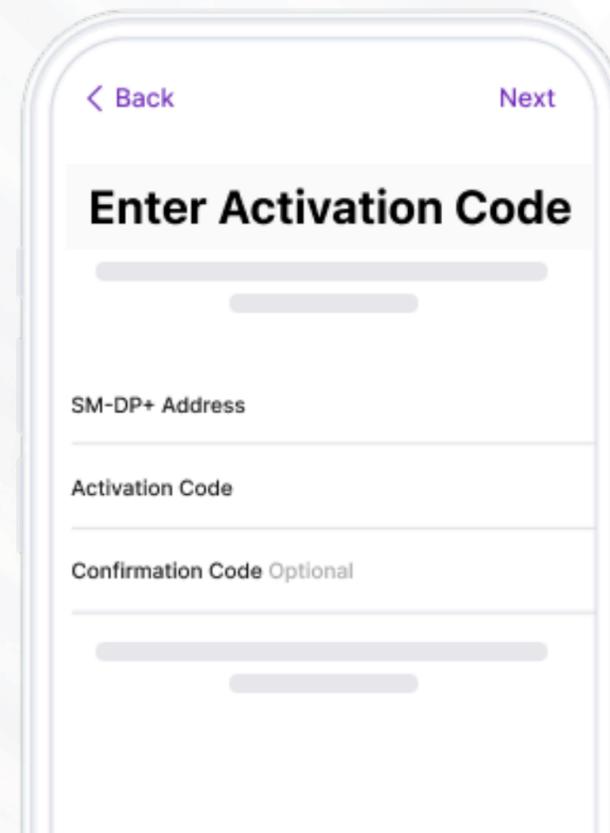

9. Open **Settings** → **Mobile Data** → Select **Roamvy** → Turn Data Roaming **ON**

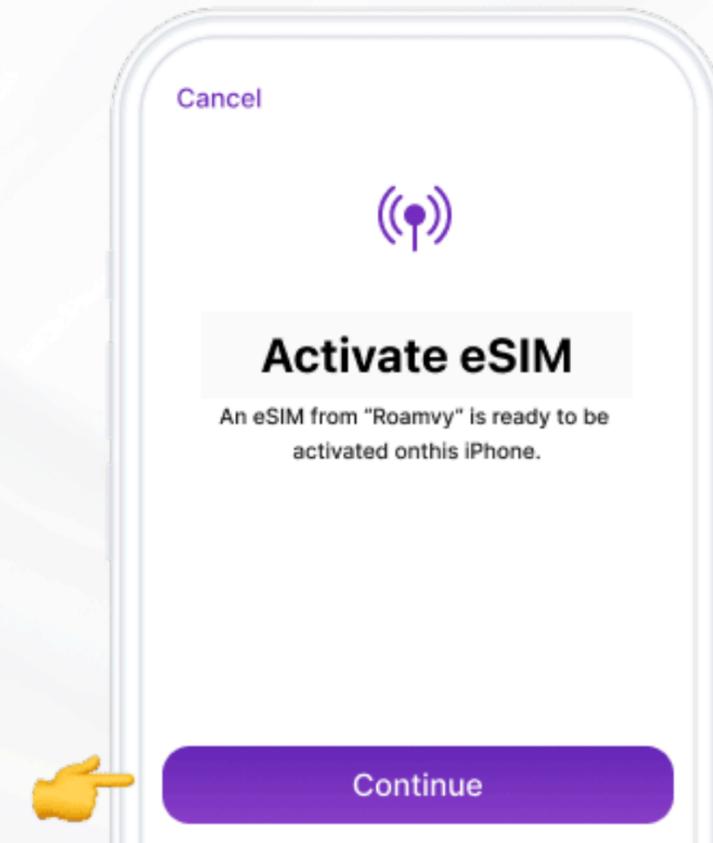

2.3 Manual Installation

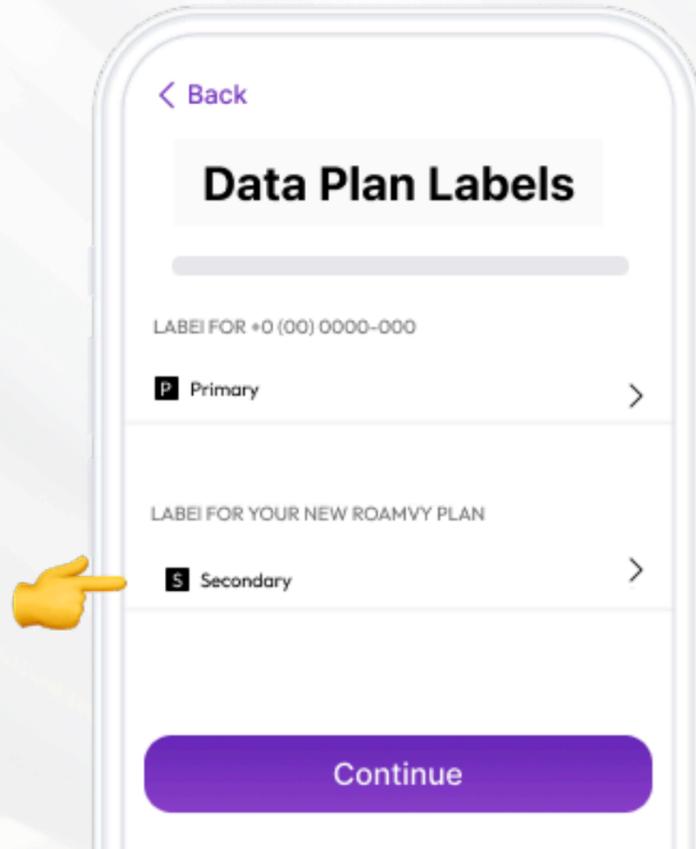

1. Go to **Settings** → Mobile Data (or **Cellular**) → **Add eSIM**, then tap Enter Details Manually.

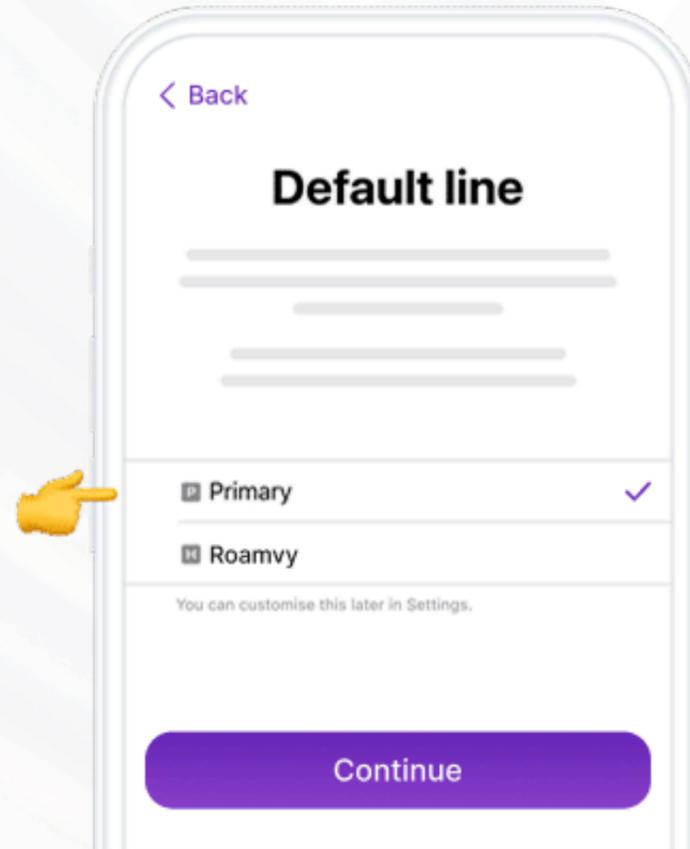

2. Enter the SM-DP+ Address and **Activation Code**, then tap Next and wait while the eSIM is added.

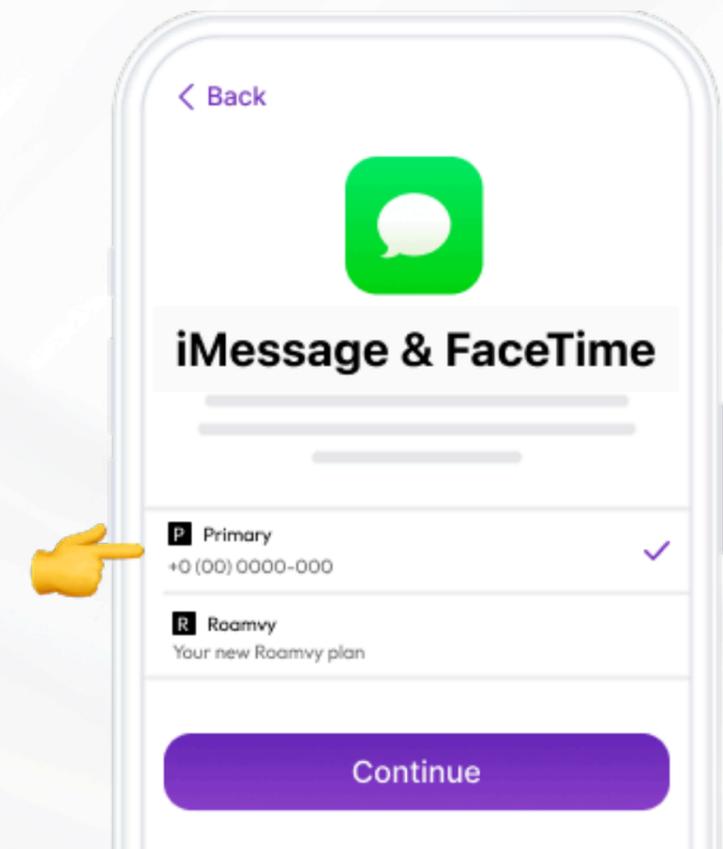

3. When **prompted**, tap **Continue**. The installation will begin automatically..

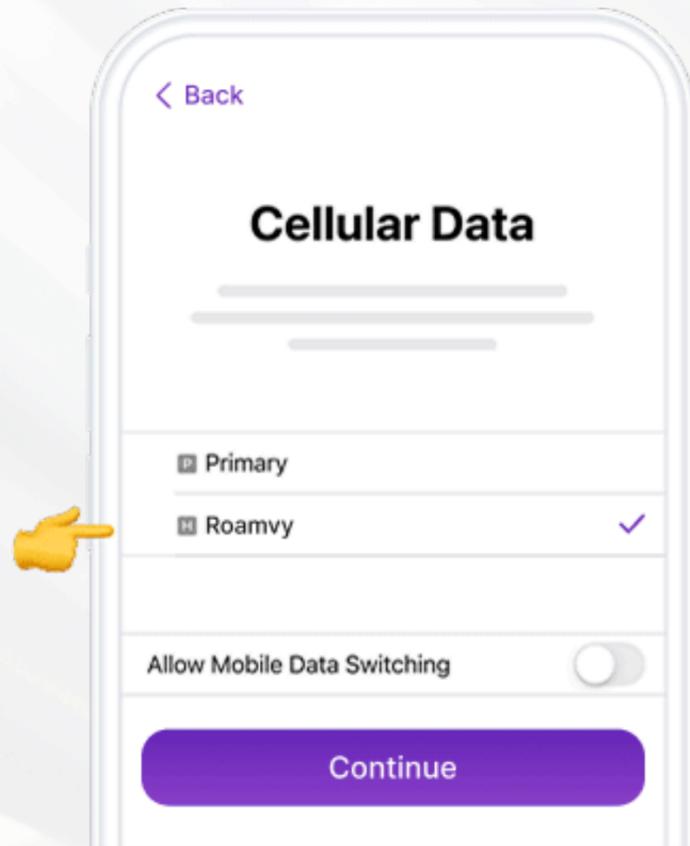

4. Tap the newly added eSIM, rename it to **Roamvy**, and then tap **Continue**.

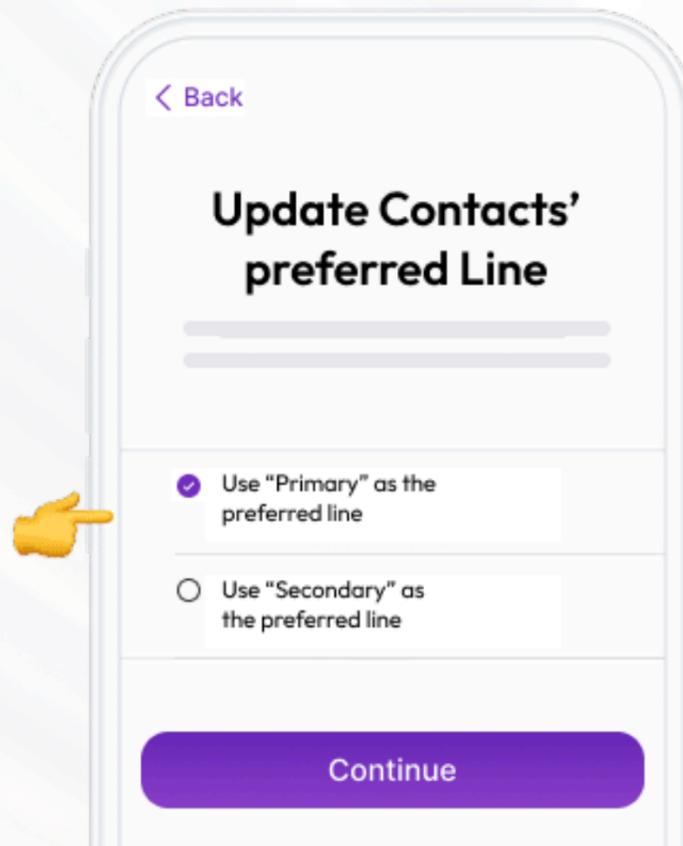

5. Select **Primary** to continue using your main number, then tap **Continue**.

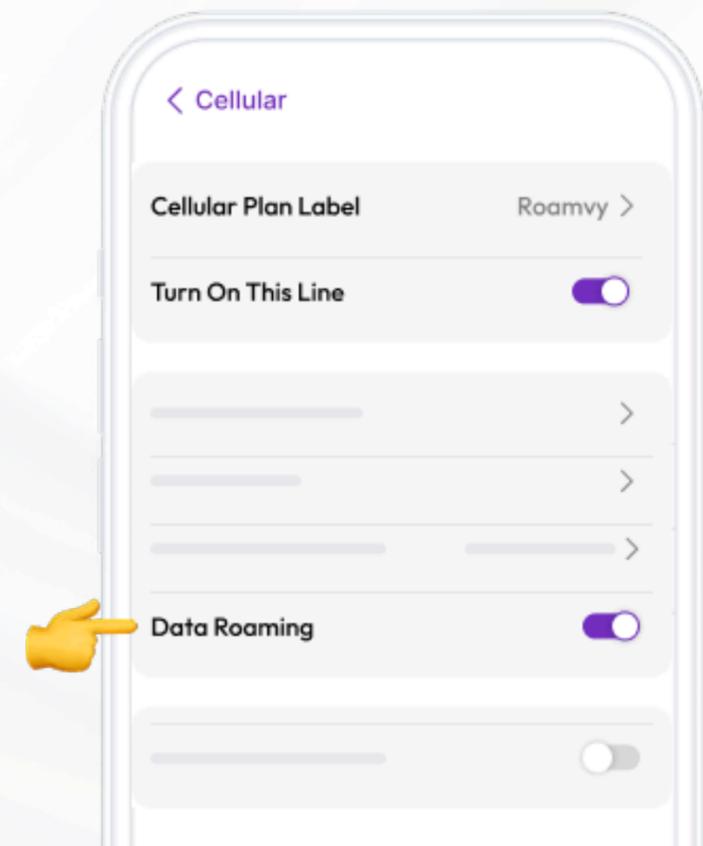

6. Select **Primary** for iMessage and FaceTime, then tap **Continue**.

7. Select the new eSIM added (**Roamvy**) for Mobile Data. Keep Allow Mobile Data Switching **OFF**. Tap **Continue**.

8. Choose **Primary** as your preferred line to keep your contacts safe.

9. Open **Settings** → **Mobile Data** → Select **Roamvy** → Turn Data Roaming **ON**

3. After Installation (What to Expect)

1

Installation Complete

Your Roamvy eSIM is now installed on your device but remains inactive until you reach your destination.

2

Arrive at Destination

When you land, simply ensure Data Roaming is turned ON for your Roamvy eSIM.

3

Automatic Connection

Your device will automatically connect to the best available partner network in your location.

4

Start Using Data

Your plan begins when your device first connects to a supported network at your destination.

4. How to Verify Your Connection

Once you've arrived at your destination - confirm that everything is working properly using these quick checks:

1. Check Your Signal

Look at the top of your iPhone screen. You should see at least one signal bar or the carrier name for your destination country displayed.

2. Check Mobile Data Settings

Go to Settings → Mobile Data → Roamvy. Confirm that Data Roaming is ON and Roamvy is selected as your Mobile Data Line.

3. Test Connection

Open any app like Safari, Maps, or WhatsApp to confirm that mobile data is working properly and you're connected.

5. Quick Troubleshooting Tips

No Signal or Connection?

- Toggle **Airplane Mode**
- **Restart** iPhone
- Verify Data Roaming **ON** for Roamvy
- Ensure Roamvy is your Mobile **Data line**
- Wait for network **registration**

Common Questions

- When does my plan start?
Upon first **network connection**
- Can I use my regular number?
Yes, for **calls** and **texts**
- Will I get roaming charges?
No, keep data switching **OFF**
